

Designer II

As a Designer II, your role is to work in close coordination with the project team to develop appropriate design solutions under the direction of the Project Designer and Design Principal. Our office thrives in a collaborative atmosphere where we seek input and value all contributions. We are looking for designers who would be eager to participate in all phases of projects and could work on programming, schematic and design development, construction documents, and construction administration phases. In this role, you will have the opportunity to develop professionally and grow your experience through a variety of project types.

The primary responsibilities of this position include:

- Participate in all aspects of design from initial programming through schematic design and plan approval by client.
- Develop graphic renderings, 3D digital massing and construction drawings.
- Develop technical details and coordinate with consultants, contractors, fabricators and regulatory agencies.
- Conduct material and product research and selection.
- Participate in marketing efforts and preparation of promotional material for potential new clients.
- Collaborate with design team, clients, consultants, contractors, fabricators, and other vendors to meet overall project objectives.

Qualifications

- Professional degree from an accredited school of architecture
- 3-5 years' experience in a design office [Architectural office preferred]
- Revit experience required
- Strong 3D visualization skills
- Ability to work independently on special assignments
- Fluency with Adobe Creative Suite, AutoCAD and 2D/ 3D software
- Strong knowledge of sustainable design principles and LEED accreditation are a plus
