

## Project Architect

Are you a creative and proactive individual who pursues challenges as opportunities? Then join our team as we strive to create transformative places of belonging and impact. As a Project Architect, your role is to provide technical leadership and documentation coordination for projects of all sizes and levels of complexity. You are self-driven, resourceful and detail-oriented to ensure the highest level of quality and service.

Strong organizational skills, flexibility, and critical thinking are necessary traits. We emphasize the importance of having a curious, speculative nature and a unique design perspective. The ideal candidate will be a licensed architect prepared and eager to participate in all phases of projects and have at least 1-year minimum experience in day-to-day direct management of a project in Construction Administration.

### The primary responsibilities of this position include:

- Planning, developing, and executing technical documentation which may include interpreting, organizing, and coordinating project team assignments.
- Direct and coordinate production of schematic, design development and construction documents in collaboration with Project Manager.
- Perform construction administration duties (e.g.: RFI's, submittals, bulletins, site observations, etc.).
- Execute applicable agency review analysis (accessibility, zoning, life-safety, etc.).
- Direct, organize, and mentor junior staff.

### Qualifications:

- Professional degree from an accredited school of architecture
- Architecture license required
- 5+ years' experience in a design office [Architectural office preferred]
- Experience directing certain technical aspects of a project
- Excellent verbal and written communication skills
- Collaborative and professional work ethic
- Fluency with Revit, AutoCAD and other 3D modeling software [Rhino/3DS Max]
- Advanced knowledge of the design process, construction documentation, and special experience/knowledge of construction administration
- Strong knowledge of sustainable design principles and LEED accreditation are a plus
